EDUCATION

The George Washington University, School of Engineering & Applied Science — **Washington, DC**
Master of Science in Computer Science (GPA - 3.87/4.0) — May 2026

Coursework: Data Structures and Algorithms, Software Engineering, Cloud Computing, AI/ML, Big Data, DBMS.

Saranathan College of Engineering - Anna University — **Chennai, India**
B.E. in Computer Science and Engineering (GPA - 3.81/4.0) — Apr 2022

TECHNICAL SKILLS

- **Programming Languages**: Python, Java, HTML5, CSS, JavaScript, Appian, MySQL, Swift, C/C++.
- **Frameworks/Libraries & Cloud Services:** SwiftUI, DASH, ReactJS, NodeJS, ExpressJS, REST API, AWS, Docker.
- **Project Management & Version Control:** Git, GitHub, Agile, JIRA, Azure DevOps, SDLC, MIRO.
- **Tools & Platforms:** phpMyAdmin, Postman, VS Code, Xcode, Supabase, MongoDB.

PROFESSIONAL EXPERIENCE

Xebia Technologies — **Jaipur, India**
Software Engineer — **Mar 2023 - Jul 2024**

- Architected and implemented a high-scale internal research management platform supporting 200+ concurrent users across 10+ functional roles, enabling data-driven milestone decisions across 30+ global pharmaceutical studies.
- Engineered and optimized a robust audit and compliance engine, integrating 135+ database triggers and stored procedures, guaranteeing 100% data integrity and full regulatory traceability for audit trails.
- Refactored high-volume SQL pipelines handling 2M+ transactional records, applying query partitioning and execution-plan tuning that reduced latency by 40% and improved throughput under parallel workloads.
- Delivered production-ready releases across 6+ Agile sprints, conducting technical demos that accelerated client sign-off cycles by 25% and achieved zero post-deployment defects.

WNS Global Services — **Chennai, India**
Technical Consultant — **Aug 2021 - Feb 2023**

- Revamped and stabilized a Fraud Case Management platform processing 500+ monthly investigations, automating routing logic to increase case resolution speed by 50% and reduce manual routing overhead.
- Developed a secure Customer 360 intelligence layer integrating 3+ APIs, dynamically masking PII to achieve 100% data privacy and accelerate investigator insights.
- Streamlined trade-matching logic with event-driven automation for unclosed transactions, reducing manual workload and improving throughput; validated deployments to ensure stable performance across 3+ rollout cycles.

TECHNICAL PROJECTS

Intelligent Video Recommendation System (Big Data & Machine Learning) — **Sep 2025**

- Engineered a distributed video-processing pipeline to ingest and transcribe 1K+ hours of multimedia data, orchestrating parallel dataflows and metadata extraction to create structured, query-ready datasets..
- Devised a context-aware recommendation engine using semantic embeddings and similarity modeling, projected to improve retrieval efficiency while scaling seamlessly across 10K+ indexed assets..

George Hacks Technical Member, Urban AQ Explorer (Dash, Python, HTML, CSS, Bootstrap, Docker) — **Jul 2025**

- Implemented an interactive air-quality analytics platform visualizing 4+ pollutants across 13K+ global cities, leveraging Dash callbacks and Dockerized microservices for seamless scalability.
- Tuned data ingestion and chart rendering processes, achieving a 60% latency reduction and delivering live insights.

Team Member, Pawfect iOS Mobile App (Swift, Supabase) — **Sep 2024**

- Built a modular iOS app with strong authentication, resilient data persistence,and optimized matchmaking, supporting 20+ simultaneous users with 0 session failures and 100% faster interaction responsiveness..
- Refined image rendering and data synchronization pipelines, enabling instant match triggers and a noticeably smoother interface across repeated 40+ user interactions..

Team Lead, Hotel Management system - Full Stack Web App — **Apr 2020**

- Led the end-to-end development of a MERN-based booking platform with role-based authentication and secure transactional modules supporting 50+ active users during live simulations.
- Enhanced API concurrency and query optimization framework, reducing request handling time under load and improving multi-user workflow responsiveness across the booking lifecycle.

LICENSURE

- **Certified Cloud Practitioner,** Amazon Web Services | **Credential URL :** http://bit.ly/44AeVXT
